**Role Playing Escape Rooms**

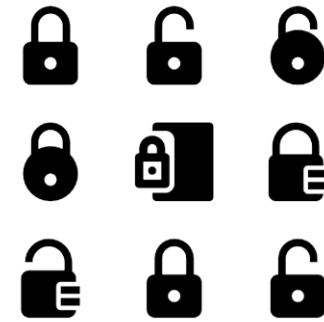

# Our Story

- Placebo is the **First Role Playing Escape Rooms Experience in The World!**
- The experience is a mix between RPG (Role Playing Games) and **Escape Room** concepts, that means the players who enter any of Placebo's Escape Rooms will be impersonating **Characters** from the associated rooms stories and only their decision based on their own story understanding will get them out of the rooms by deciding how the story will end.

# Our Story

- **Our Role Playing Escape Rooms** are designed to fit on the Stories we invent and in order to escape any of our rooms you have to fully understand what the stories are trying to tell you. Every clue you solve reveals an event, and until you gather all the events and start realizing the facts behind the rooms, you will not be getting out using your IQ nor your luck.
- **Placebo RPER Team** invents the Rooms Stories so the players will not be relating to any Movies/Books/Games they have seen, which makes it a pure experience.
- **Launching Date:** December 2016
